Evening Brief

Date: Sunday, July 23, 2017

Weather Summary

*** HIGH RISK for Mixed Dry/Wet Lightning Monday across parts of Idaho ***

Moisture surging northward from northern Nevada on Monday will enhance showers and thunderstorms into southern Idaho and eventually into much of western/central Idaho by late in the day. Further south and east, this increased moisture will result in scattered showers and wet thunderstorms over the southern Great Basin on Monday, spreading into eastern NV and much of Utah on Tuesday.

Preparedness Levels

Great Basin	4
National	4

Great Basin Fire Activity (from Irwin): Heavy Activity

New Fires and Acres: 42 fires for 5,517 acres. 1 acre existing large fire growth.

Resources:

- Crews: 18 T1 IHCs in GB: 10 committed, 1 RR, 7 available.
- T2 IMT Team 4 – Roide is committed to the Missouri Fire.
- GBCC has committed an estimated 79 + type 3, 4, 6 engines.
- 3-T1 and 4-T2 helicopters are available in GACC.

Great Basin Fire Potential Summary

Fire danger remains elevated across the west and north under warm and dry conditions. Moisture returning to the Great Basin will bring a decrease in overall fire danger to much of central/eastern Nevada and Utah by the middle of this week.

Fuels continue to moisten across southern and eastern UT, the AZ Strip and parts of Srn NV with the recent trend towards wetter showers and thunderstorms in those areas. ERC's are on the downward trend over these areas, especially UT and the AZ Strip with a more gradual decline over southern NV.

Fine fuels, which have been the main contributor to fire spread early this season in the north and west, will moisten over the next 2 days across much of Nevada and Southern Idaho. Higher than normal fine fuel loading and continuity exists over the northern half of the Great Basin, so these finer fuels will quickly become factor again after a few days of hot/dry weather.

ERCs have increased to above the 80th percentile in many areas. The mountains of Central Idaho have seen the most rapid drying of fuels with ERC's also approaching the 90th percentile in a few spots

We have issued a Great Basin *Fuels and Fire Behavior Advisory for Nevada and Utah*, available at the following link:

https://www.predictiveservices.nifc.gov/fuels_fire-danger/GB_Fuels_and_Fire_Behavior_Advisory.pdf
